5. What sets us apart?

- We have been running a non-public Kindergarten for 12 years, it is located on the Żabiniec estate, until June it was run under the name of "Pluszowego Misia" non-public Kindergarten.

- Caring for the smooth adaptation of the youngest children in the institution - adaptation programs and support of specialists (including afternoon preparatory classes for kindergarten, or if a group of min. 5 children willing, we can conduct classes on Saturdays).

- Small groups - we strive to create an intimate, almost homely place, alternative to a large kindergarten. Toddlers will have the opportunity for a stress-free start to their first adventure with kindergarten (groups of 15-20 people max).

- Child-friendly education and exemplary school preparation.

- Qualified and competent teaching staff - full of knowledge, passion, care and creativity.

- In conducting classes from the core curriculum, teachers use a variety of teaching methods and techniques, including elements of Maria Montessori's pedagogy, activating methods such as the

project method, drama, Veronica Sherborne's Developmental Movement method and multimedia techniques, games and relaxation exercises.

- English Every Day - English as a second language of communication in everyday situations and during selected activities. Classes with the EMYS robot, which introduces children to the world of English-language tasks, games, projects with a smile.

Daily 30 minutes classes with a teacher are a great fun for the children. An important part of the classes are movement games, reading and watching movies in English or doing artwork together. Children will also have contact with English during everyday activities such as washing hands, going to the garden or eating meals together, which allows them to assimilate new vocabulary in a natural way.

- Early learning of reading and writing through play with the Method of Good Start developed by Prof. Marta Bogdanowicz.

- Early mathematics education using the method of "Children's mathematics" by Prof. E. Gruszczyk-Kolczynski.

- Additional activities include JAKU nature education, Robotics - constructing and building robots from Lego bricks, dog therapy, games and physical activities on the interactive Magic Carpet, workshops developing creative thinking and manual skills with Play-doh dough, supporting fine motor skills through "Beadwork" activities, fairy tale therapy, sensoplastics activities, social-emotional workshops (TUS - Social Skills Training).

- Care of specialists - cooperation with a team of specialists - speech therapist, special educator, psychologist.

- Children with special education evaluations are provided with specialized care and have reduced tuition fees.

- Systematic monitoring and support of children's development - pedagogical observations, diagnosis of educational progress in key school skills, regular meetings with parents during which progress, successes and additional needs of children are discussed. If necessary, together with specialists, programs will be established to support the individual development of the child.

- Teaching rooms - in preparation for work with children. They will be arranged in a nice, cozy way, professionally landscaped with teaching aids to encourage children's continuous development. In addition, the halls will be equipped with overhead projectors, multimedia projectors, an interactive Magic Carpet.

- Our kindergarten's catering is provided by Alma Verde, a company that has focused on kindergarten food service and healthy food production for more than a dozen years. Alma Verde provides organic and healthy meals for the children supplemented with fresh vegetables and fruits, homemade cakes and our own basic food products.

- Taking care of the safety and health of children - the entrance to the Kindergarten will be secured with a code, we will carry out regular ozonation and disinfection of rooms, air purifiers will be installed in the teaching rooms, surfaces will be protected with photocatalytic antiviral and antibacterial coating.
